Financial Market Strategies
Introduction to NFTs and Classic Cars

Discussion Outline

What If

- Aficionados could buy a share in their dream classic car?
- Collectors could effortlessly offer parts of their collection, recouping liquidity and boosting the value of cars and their collection?
- Mainstream Investors could gain access to an asset class not available to them today?
- The Classic Car Market could be disrupted so that collectors and new investors profit sustainably and preserve values for future generations?

There will be a discussion opportunity with experts and participants during the Drinks & Networking hour after the panel discussion.
